

BF Inspections Ltd (Building Facade), can represent your company and provide inspections for curtain wall, windows, components and parts through fabrication, assembly and glazing of units, and site installation, globally, to ensure that the specified product and curtain wall is being produced to the highest quality to envelope a building.

Working with your company and in order to minimize later difficulties with the exterior envelope of a building, BF Inspections can carry out factory and site inspections from mock up or prototype stage, right through all the processes involved, to the installation and completion of the curtain wall, windows, on the exterior of the building.

Inspections include:

- **Specification, Drawing Overview**
Reviewing specifications, red lining drawings, highlighting weak areas or weaknesses.
- **Mock Up Inspection.**
*Mock up extrusion dry fits, to insure fabrication is correct.
Visiting mock up testing in the chamber to insure it preforms as specified, offers advise on issues found.*
- **Materials Procurement Quality**
*Factories visits to insure (Glass, Aluminum, Stone, Stainless Steel, Gaskets, ect) are being made to the highest quality and meet the standards and specifications set out.
Review quality control procedures for Material manufacturing.*
- **Shop Assembly Process**
*Assembly shop visits to insure the units are being assembled and glazed as per the approved drawings.
Review quality control procedures for assembly and glazing of unitized curtail wall.*
- **Installation Process**
Site visits to insure the wall is being installed as per the approved drawings
- **On Site Testing**
Witnessing of field testing to insure these are carried out properly and insuring the wall preforms on the building as specified,

Inspections can be done at source or on site and daily reports and full visit reports issued on completion of each inspection.

Rates are reasonable and can be discussed by contacting Aidan Doyle at the above phone number or email address.
